

ATTENTION ANGLERS

To increase knowledge about walleye and northern pike movement within the Qu'Appelle River System, a tracking study is being conducted by the Water Security Agency. Walleye and Pike may contain one or both of the tracking devices pictured below. PIT tags will be located in the dorsal muscle whereas telemetry tags will be inside the abdomen.

PIT
Tag

If you capture and keep a tagged walleye or northern pike please do the following:

1. Record where/when you caught the fish.
2. Remove and keep the tag/transmitter.
3. Return to one of the persons listed here.

Your cooperation is greatly appreciated.
